Dear Sir,

I'm writing to convey my interest in working with your company as a Flutter Developer. I am currently pursuing Bachelor's degree in Computer Science and Engineering from Khulna University of Engineering and Technology (KUET), as well as experience working on one commercial project that gave me Flutter and Dart skills. My qualifications and experience are a perfect match for what you're looking for in a Flutter developer.

Designing and developing code for various mobile applications, as well as testing the generated code to suit customer needs, are all part of my professional experience. I've also presented progress updates to project stakeholders while working in a collaborative atmosphere.

Here are some highlights of my Flutter application design qualifications and professional accomplishments:

- Designed and developed a NFC based app [Godzeela](#) for commercial purpose.
- Designed and developed an Instagram clone app [PickUP](#) using firebase as backend.
- Designed and developed a live group chatting app [FlashChat](#) using firebase as backend.
- Undergone several Flutter Courses from [Udemy](#).

My desire to work for your company stems from my desire to create useful and appealing Flutter applications, and my eye for design and user-driven development approach make me a perfect choice.

Please contact me on [email](#) if you believe I'd be a good fit for your company.

Sincerely,

Arafat Rohan
